PROFESSIONAL SUMMARY

As a self-taught software engineer driven by a passion for innovation, I specialize in full-stack development with an emphasis on responsive design and code optimization. Currently, I am involved in developing scalable interfaces and enhancing user experiences through integrated frontend and back-end solutions. I excel in dynamic environments and actively pursue opportunities to enhance my skills with emerging technologies.

EXPERIENCE

Web Developer (Freelance)

Oct 2024 — Present

Digital media africa

Boulevard MY Hassan 1er immeuble sibamblock 3eme n10

- Developed and maintained responsive client-facing websites, reducing page load times by 30% and post-release defects by 40%, by integrating LESS preprocessors, performing continuous bug fixes, and collaborating on upgrades and feature testing

Event Support (Siel Manager)

Apr 2024 — Apr 2024

Marvel

OLM Souissi

- Managing stand logistics and supporting artists during SIEL

EDUCATION

Ibn Tofail university, Av. de L'Université, Kénitra

Oct 2025 — Jul 2026

Bachelor's Degree

Pro-Systems, 12. Avenue Prince Moulay Abdellah

Oct 2023 — Jul 2025

Specialized Technician Diploma in IT Development

CERTIFICATIONS

Certificate_Preparing for a career as a developer by Microsoft

May 2024

Microsoft

Credential ID: 29d51bd398a359a2ed1fe27efd2d3b0a8ba280b7d075cdc98550fb8deeeef279b

PROJECTS

MindTrack AI | TypeScript, Laravel, TailwindCss, HuggingFace AI Models, MySQL

Sep 2025 — Dec 2025

- MindTrack AI is a personal emotional companion that analyzes text and voice understand a user's mood and mental state over time.
- Real-World Problem It Solves Mental health tracking apps today rely mostly on manual input or basic questionnaires.
- MindTrack AI goes further by analyzing real multimodal signals (text, audio tone, facial expression) to deliver more objective and adaptive well-being insights.

MediLensAI | Laravel, PHP, Blade, Huggingface Api Models, Tailwindcss

Jun 2025 — Apr 2025

- Healthcare professionals and patients often deal with unstructured multimodal medical data (lab reports, X-rays, CT scans, prescriptions, voice notes, etc.). MediLens AI turns these into actionable insights and summaries.
- This project addresses the fragmentation of medical data problem, by using multimodal AI to make healthcare information accessible and actionable.

SKILLS

Programming Languages: PHP, Java-script, Type-script, HTML, CSS, Java, Oracle DB, SQL, PISql

Developer Tools: Git, Github, Postman, API, REST APIs, Docker, Xampp, UML, Enterprise Architect

Frameworks: Reactjs, Tailwindcss, Laravel, Django
